## PROJECTS

### Rate-Pulse (10/2023 - 01/2024)

- **OTA Ranking Visualization:** Spearheaded the development and implementation of a dynamic system within Rate-Pulse, providing hotel owners with intuitive graphical representations of their ranking across prominent OTAs (Online Travel Agencies) such as Agoda, Booking.com, etc.
- **Parity Insights Integration:** Engineered a feature set within Rate-Pulse to display parity data for the past 7 and 30 days, enabling hotel proprietors to analyze and compare their rates effectively across multiple platforms.
- **Fluctuation Analysis Tools:** Designed and implemented tools for visualizing and analyzing fluctuations in hotel rankings and rates, empowering users to make informed decisions based on historical performance metrics.
- **Graphical and Tabular Interface Development:** Contributed to the creation of user-friendly interfaces employing graphs and tables, ensuring an intuitive and comprehensive user experience for hotel owners interacting with Rate-Pulse's data visualization tools.

### Hotel Management System (10/2023 - 01/2024)

- **Implemented Responsive UI Design:** Developed a user-friendly and responsive front-end interface using ReactJS and Tailwind CSS, ensuring seamless navigation and optimal user experience across various devices for a Hotel Management System.
- **Integrated Dynamic Functionality:** Engineered interactive features and functionalities within the system, enabling real-time updates, room bookings, and streamlined management of hotel services, leveraging ReactJS components and Tailwind CSS styling for a modern and efficient user workflow.
- **Optimized Performance and Styling:** Employed Tailwind CSS utility classes to efficiently style and structure components, ensuring a visually appealing and performance-optimized interface, enhancing the overall aesthetic and usability of the Hotel Management System.
