SUMMARY

Dynamic software engineer with 2.5+ years of experience dedicated to crafting efficient, scalable, and innovative solutions. Proficient in multiple programming languages and technologies, adept at translating complex requirements into streamlined, user-centric applications. Committed to continuous learning and improvement, passionate about leveraging technology to solve real-world problems and enhance the lives of users globally.

WORK EXPERIENCE

Software Developer Engineer 1, GoComet India   Jun 2022 - Present

- Proficient in developing robust RESTful APIs using Grape and ensuring their reliability through comprehensive test suites written in RSpec. Experienced in implementing queuing architectures utilizing Sidekiq for efficient task management and execution.
- Skilled in automating processes to reduce manual work and improve efficiency, leveraging tools and frameworks to ensure the reliability and stability of software applications.
- Proficient in database management systems including MongoDB and PostgreSQL, optimizing data storage and retrieval processes to meet product requirements.
- Knowledgeable in ETL (Extract, Transform, Load) processes, contributing to efficient data processing and analysis for product enhancement. Well-versed in microservices architecture, facilitating scalability and modularity within software systems to support evolving product features.
- Familiar with Python and JavaScript for scripting tasks and frontend development.
- Familiar with debugging techniques using Google Console, essential for maintaining product stability and performance.
- Adept at integrating third-party APIs for seamless data exchange, enhancing product functionality and user experience.

Full Stack Developer Intern, Square Off   Oct 2021 - Apr 2022

- Played an integral role in the tech team, focusing on backend tasks using MVC architecture in PHP Laravel framework.
- Contributed to frontend development tasks, enriching user interfaces for enhanced user experience.
- Developed Slack notification functionality by configuring custom apps and utilizing webhooks, improving team communication and productivity.
- Utilized Google Tag Manager and Google Analytics for website traffic analysis, including creating funnels to track user journeys and behaviors.
- Applied JavaScript for writing frontend logics, ensuring dynamic and interactive website features.

Full Stack Developer Intern, DND Exim   Mar 2021 - May 2021

- Joined as an intern at a new logistic startup with a focus on automating the process of booking logistics online and tracking shipments. Designed the database architecture and planned the backend infrastructure for the product.
- Utilized PHP Laravel for backend development, ensuring scalability and efficiency in handling logistics operations.
- Contributed to frontend development by working on the admin dashboard, enhancing user interface and experience.

EDUCATION

B.E in Information Technology	2019 - 2022	**Diploma in Computer Technology**	2016 - 2019
K.C. COLLEGE OF ENGINEERING & MANAGEMENT STUDIES & RESEARCH		SHAH AND ANCHOR KUTCHHI POLYTECHNIC	

ADDITIONAL INFORMATION

- **Technical Skills:** Php, Ruby, Java, MySQL, PostgreSQL, MongoDB, Javascript, ReactJS, Object Oriented Programming
- **Framework:** Laravel, Ruby On Rails, Bootstrap
