Highly skilled DevOps Engineer with 9 months of hands-on experience in Software Configuration Management, version control, DevOps/Build, release management, and Linux administration. Proficient in Git, Subversion, Jenkins, and AWS for efficient software development and deployment. Demonstrated expertise in managing AWS services with a strong track record in cloud infrastructure implementation and maintenance.

WORK EXPERIENCE

Company Mobiloitte Technologies, Delhi
DevOps/AWS Engineer

May 2022 – February 2023

- Efficiently managed Git repositories, overseeing branching, merging, and tagging processes to ensure effective code management and version control.
- Provided day-to-day support for Git and Bitbucket, performing administrative tasks and promptly resolving issues.
- Configured and managed SonarQube for code quality analysis, conducting static code analysis, and identifying/resolving code vulnerabilities and technical debt.
- Collaborated seamlessly with development, QA, and operations teams to optimize the software delivery process, facilitating integration, testing, and deployment.
- Conducted routine system monitoring and troubleshooting, proactively identifying and resolving performance bottlenecks to enhance system reliability and performance.
- Developed and implemented efficient CI/CD workflows utilizing Jenkins, Maven, and Git, resulting in a remarkable 30% reduction in deployment time.
- Collaborated effectively with cross-functional teams to optimize system performance while ensuring strict adherence to security and compliance standards.
- Implemented and maintained cloud infrastructure using AWS services, guaranteeing scalability and high availability for critical systems.
