Projects

- **Fitness Tracker**
  The Fitness Tracker is a comprehensive web application designed to help users track their workouts, set fitness goals, and monitor their progress over time. Built with React.js for the frontend, Node.js for the backend, and MySQL for database storage, this project provides a seamless and intuitive user experience for individuals striving to achieve their fitness objectives.
- **Paying Guest Accommodation System**
  This project will require proficiency in PHP, SQL, HTML, CSS, and possibly JavaScript depending on the complexity of the UI. Additionally, you may need to use frameworks or libraries for certain functionalities, such as user authentication or payment processing.
