OBJECTIVE

Detail-oriented graduate excited to contribute coding proficiency, analytical thinking, and collaborative value in a software career

EDUCATION

- **Bachelor of Engineering in Computer Engineering**

Lj Institute of Engineering and Technology
(June 2019 - June 2023)

CGPA : **9.16**.

- **High School Diploma (HSC)** from VR Shah High School,Ahmedabad,Gujarat

(March 2018- March 2019)

- **Secondary School Certificate (SSC)** from New Samarth English School, Ahmedabad, Gujarat (March 2016- March 2017)

PROJECTS

- I have contributed to the development of an **Android application** that leverages the Matter protocol to seamlessly engage with both **Wi-Fi** and **Thread-enabled** devices.
- Developed **machine learning models** for dual purposes: one for accurate heart disease classification and another for predicting bulldozer prices
- Designed Management System by employing the **KMM HTML library** for a sophisticated and leveraging **NodeJS** to power the robust backend infrastructure
- Developed an **Android app** which can get prices of product from different **e-commerce website** so user can get best offers out of them to fetch prices and **python server** was developed to scrap the prices from the web

SKILLS

Technical Skills:

- Programming Languages: Python, Javascript, Kotlin,
- Web Development: HTML, CSS
- Frameworks: Tensorflow,Node
- Databases: MySQL, MongoDB
- Version Control: Git
- Software Tools: Visual Studio, Atom,GitLab,Android Studio
- Operating Systems: Windows, Mac OS

Soft Skills:

- Effective Communication
- Problem Solving
- Teamwork
- Adaptability
- Learning Mindset

INTERNSHIPS

- I have done 12 month internship in app development at elnfochips (23/1/23-29/1/24)
- I have done 3 month summer internship in php web technology at Brainy Beam

CERTIFICATIONS

- **Python** course on **Udemy**.
- **Node** course on **Udemy**.
- **Machine Learning** course on **Udemy**.
