PERSONAL PROJECTS

Online job portal

- This project is aimed at developing an online search Portal for the Placement Details for job seekers.
- The system is an online application that can be accessed throughout the organization and outside as well with proper login provided.
- This system can be used as an Online Job Portal for job seekers.
- Job Seekers logging should be able to upload their information in the form of a CV.
- Visitors/Company representatives logging in may also access/search any information put up by Job aspirants.
- Stacks used: HTML, CSS , JavaScript, PHP & MySQL

Online tutorial management

- Users should be able to view the Home page, About Us, and login/Register page of the website.
- Users should be able to search for the courses in which they are interested.
- Users will be asked to enter the user type as Student, or Instructor while creating the account.
- Users who have been marked as Students will be allowed to enroll in the available courses and will be displayed the courses in which they are already enrolled.
- Users marked as Instructors will be able to teach the course which is not taught by anyone else. They will be able to see the courses which are taught.
- Admin type of user will be able to add or delete courses as well as delete instructors from the courses.
- tacks used: HTML, CSS, bootstrap, javascript, MSSQL,DOT NET

Tourism Management

- This project is based on how an effective travel website will make us feel. It is based on a traveling website with fully-featured functions that will activate the traveling bug with vibrant imagery.
- This website contains highlights of some important places along with high-quality photography .
