Intern

- Gained hands-on experience in front-end development technologies and frameworks.
- Worked on team projects to apply theoretical knowledge in practical scenarios.
- Received mentorship from senior developers and actively participated in code reviews.

PROJECTS

Unique Mobile Shop

- **Back-End:** ASP.NET, C#
- **Front-End:** HTML, CSS, JavaScript, Bootstrap
- **Tools:** MySQL, Visual Studio
 - This e-commerce application facilitates online mobile shopping, providing a seamless and user-friendly experience.
 - **Product Purchase:** Users can browse and buy mobile phones. When a product is added to the cart, the bill is generated automatically.
 - **Admin Panel:** Products are dynamically added and managed through an admin panel. The admin can manage products and users, including the ability to add, edit, or delete them.

The Cake Shop

- **Back-End:** PHP
- **Front-End:** HTML, CSS, JavaScript
- **Tools:** MySQL, Sublime Text
 - The Cake Shop is a web application where customers can browse and order cakes online.
 - They can add selections to a virtual cart and see the bill automatically updated.
 - An admin panel allows for easy cake management, with the ability to add, edit, and delete offerings.
