OBJECTIVE

With a keen interest in data science, analytics, and machine learning, seeking a challenging position in a reputable company that promotes continuous learning and career growth, where I can utilize my expertise and contribute to the growth and development of organization.

EDUCATION

B.Tech in Information Technology | CGPA 8.3 (6th sem) **Sept 2020 – Jul 2024**
Ganpat University, Kherva

HSC | GSEB **Jun 2019 – Mar 2020**
Gurukrupa Vidhyalay, Ahmedabad

SSC | GSEB **Jun 2017 – Mar 2018**
Thomas Higher Secondary School, Ahmedabad

SKILLS

Programming : Python, SQL
Subjects : DBMS, DSA
Data Cleaning
Data Visualization
Soft Skills : Analytical Thinking, Team Oriented, Communication Skills

PROJECTS

Car Price Prediction Model
- Implemented a Linear Regression model to predict the price of used cars.
- Engineered a seamless user experience by spearheading the implementation of a Flask-based website, incorporating a trained Linear Regression model to accurately predict prices.

Multiple Diseases Prediction System
- Implemented various machine learning algorithms to predict whether the person is having a particular disease or not based on the symptoms.

CERTIFICATIONS

What is Data Science by IBM | Coursera
- Acquired the basic knowledge, fundamentals and key concepts related Data Science.

Tools for Data Science by IBM | Coursera
- Received an understanding of key tools used in data science, practical skills in Python programming, Jupyter Notebooks, SQL and data visualization.
