PERSONAL PROJECTS

Amberis

- Amberis is a comprehensive web application crafted on the ASP.NET MVC Core framework, with SQL Server as the backend database. The project was conceived to address policy-related needs, catering specifically to the requirements of our esteemed UK client

Payment Gateway Integration

- In this i have created a simple website where payment gateway is integrated .There is a simple Donate button on homepage on clicking the button,the user will land on payment page where user can select amount to be paid and payment type,e.g credit card ,paypal etc.
- Once payment is done and invoice will be generated and email will be sent to the user for payment received.The user can also download it.
