## Portfolio

As a WordPress developer, my work involves providing expertise and support in various aspects of WordPress website development and management. Here's a summary of typical responsibilities: Website Development: Designing and developing WordPress websites tailored to clients' needs, ensuring functionality, usability, and performance. Plugin Selection and Customization: Advising on and implementing plugins to enhance site features, and customizing them as necessary to meet specific requirements. Overall, the role of a WordPress developer involves a comprehensive understanding of WordPress and its ecosystem, coupled with the ability to translate client needs into effective and scalable solutions within the platform.
